WIRELINER WEIGHT INDICATOR SYSTEMS

FEATURES:

- 6" easy-to-read, fluid filled dial faces available in pounds kilograms, decanewtons, or dual scale.
- Panel mount or box mount variations available
- Includes custom-sized tension load cell and hydraulic hose
- Adjustable damper system allows for measuring even the smallest changes in pressure
- Calibration certificates provided with each system
- The following capacities are available: 1,000, 2,000, 3,000, 4,000, 5,000, 6,000, and 10,000 pounds.

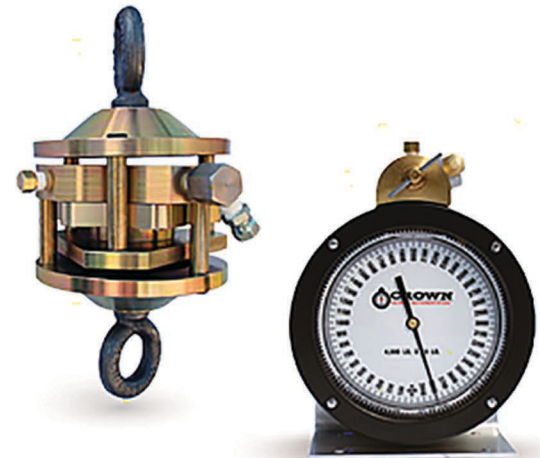

Type	Capacity	Load Cell Description
CTC-102-2	2,000 pounds	Light-weight aluminum tension load cell
CTC-104	4,000 5,000 pounds	Steel tension load cell
CTC-107	6,000 10,000 pounds	Heavy-duty piston-type cylinder

BENEFITS:

- Very close calibration tolerances
- Will withstand even the harshest environments: proven to work in temperatures of -31° to 122 F° (-35° to 50° C)
- System can be configured into many variations and can be used for multiple purposes
- User-friendly and easy to maintain
- Load cells are easy to repair in the field

TO ORDER SPECIFY:

- Required system capacity
- Dial reading preferences: English, Metric, or dual scale
- Required hose length

Crown Oilfield Instrumentation's Wireline Weight Indicators are durable, low-maintenance and user-friendly. These precision weight indicators will help to protect your downhole tool investment by gauging line tension and alerting the operator of any potential problems. Hydraulically operated, Crown's single line weight indicator systems come with 6" fluid-filled gauge, tension load cell, hydraulic hose and Crown's all-weather instrument fluid.
